

Where am I?

Integer Card Game

Where am I?

Cut out the integer cards (or print them on Business Card stock and separate them).

Draw a large horizontal or vertical number line (on foolscap, bristol board, chalk board, white board etc.) from -25 to 25 scaled by 5's.

Where am I?

Option 1:

Shuffle the cards and deal yourself 8 random cards from the deck.

Place the integer cards on the number line to demonstrate your understanding of their location.

Where am I?

Option 2:

Same as Option 1 but, play with a partner and alternate turns.

Where am I?

Option 3:

Use different scales to create the number line then place the integer cards to demonstrate your understanding of their location.

Where am I?

Option 4:

Use the Alternate Set of Positive Integers for variety, either instead of the original set of positive integers, or in addition to the original set.
